

1. OCTA NORM frame
This frame has been re-used for the 8th time, because of it's *flexibility*.
It can be used for at least 5 more years

2. Presentation wall
The triangle pattern on the wall is a graphic translation of what Stamhuis does: efficient, modular and prefab building

3. Standing tables
Standing table 'Stamhuis circular system'
This table has been re-used five times and is made of *modular parts*

4. Modulair bar
Our modulair bar can be used in *different settings* and applications,
made of recycled material

5. Chipboard wall with perforations
The walls are made of *95% recycled* Chip material, collected from our own projects in collaboration with Unilin.
For good acoustics, the wall is provided with a perforation pattern.

6. Storage room
Made out of *5% virgin raw materials* and *95% recycled wood*

7. Canopy with truss-system
We save on material and transport by renting a truss system and frame.
The canvas with Stamhuis logo can also be used for next designs.
